

# NEW NOBLIS HEADQUARTERS: KEEPING THE ENVIRONMENT TOP OF MIND

9 interesting facts about our LEED Certified Space

1

We selected a building that is **LEED certified** and in a location that is served by public transportation with nearby amenities.

2

Our building will use **35% less water.**

3

By optimizing lighting controls that dim automatically, we are taking advantage of **natural daylighting** to save energy and provide even lighting throughout the day.

4

We have **Energy Star rated appliances and equipment** throughout the building to reduce energy consumption.

5

We have designed our space and mechanical systems to **optimize our energy performance.**

6

Construction materials and furniture were **regionally sourced and manufactured** reducing our impact on the environment.

7

Construction materials and furniture with **high amounts of recycled content** were used throughout the project.

8

By using materials throughout the project (such as adhesives, paints, flooring, furniture, etc) that emit a low level of toxins, we are **improving our indoor air quality so everyone can breathe easier.**

9

90% of the seats have been designed for daylight and exterior views so **nearly everyone has access to natural light.**
