DELIVERING INNOVATIVE DIGITAL SOLUTIONS ON AN ENTERPRISE SCALE

Noblis' Center of Digital Excellence (CoDE) delivers digital solutions that align with our clients' environment, goals, and objectives through integration, collaboration, and automation.

OUR HOLISTIC APPROACH TO DIGITAL SERVICES

Whether guiding programs, adopting a DevOps culture, or delivering large-scale systems, Noblis' CMMI-rated, holistic approach to digital services delivers results through strong product management, user-centric design, adaptable agile practices, predictable release cycles, and commitment to quality. As organizations are faced with challenges spanning these areas, a sophisticated level of enterprise automation is often required to accomplish their missions. The base of cross-domain experts and tools provided by Noblis and our Center of Digital Excellence (CoDE) can ensure mission objectives are met.

Noblis experts are highly certified in Agile Practices and User Experience Design. Noblis has been appraised at CMMI® Maturity Level 3 for our client-facing agile software development projects. Our goal in gaining the appraisal was to validate the level of excellence in our performance and the rigorous work processes that we know our clients expect from Noblis.

OUR CAPABILITIES

CONTINUOUS INTEGRATION, CONTINUOUS DELIVERY (CI/CD) AND MONITORING

CI/CD and monitoring are the foundation of building, deploying, and operating systems. Our experts execute CI/CD pipelines using industry standard open source and COTS tools. We ensure operational success by applying state of the art monitoring and site reliability practices.

MODELING & SIMULATION

Our experts assess alternatives, estimate benefits, and engage stakeholders for systems of varying sizes and complexity. Our suite of innovative modeling and simulation capabilities inform decision making at tactical and strategic levels.

DATA VISUALIZATION

Our data visualization experts work at the intersection of big data storytelling and design. Our experience and data visualization capabilities produce compelling data experiences that provide value to all levels of an organization.

USER CENTERED DESIGN

We understand that the right user experience (UX) will enhance your brand, build loyalty, and engage users. That's why we pair our UX designers with subject matter experts to create enjoyable experiences out of the most difficult problems.

MOBILE & CONNECTIVE APPLICATIONS

We employ diverse resources including Agile development technologies and highly effective tools and frameworks to ensure a product that best aligns with our client's environment, goals, and objectives.

OUR TEAM IN PRACTICE

Noblis has a long history of providing digital services to a wide range of customers spanning our mission areas. We have helped clients bring new technologies to bear, optimize delivery operations of systems, and position leaders to make informed, value-based decisions.

Versatility of Noblis Cross-Platform Model

Noblis developed the General Services Administration's (GSA's) Sustainable Facilities Tool (SFTool). The SFTool empowers building managers, real estate specialists, and project managers to make informed decisions, creating a cost-effective approach to building and maintaining sustainable facilities. In response to GSA's shifting needs, our mobile solution enabled rapid conversion of a platform from a native app to a mobile-friendly, responsive website. The result was faster response times, real-time content updates for all screen sizes and operating systems, and increased end-user satisfaction.

WHY NOBLIS?

Noblis tackles complex and challenging problems by integrating expertise with unmatched tools and technology. Our proven technical and domain expertise leverages best practices and lessons learned. Noblis' highly-skilled experts offer a keen understanding of customer environments and vast knowledge of technology and systems. We employ diverse resources including Agile development technologies and highly effective tools and frameworks to ensure a product that best aligns with our client's environment, goals, and objectives.

Noblis delivers complete digital solutions.

DOING WHAT'S RIGHT AND WHAT WORKS FOR OUR CLIENTS

Noblis fosters a culture of collaboration. Through our Centers of Excellence (COEs), we are connecting our staff so that they may better serve our clients. The COEs reach across domain areas and our three companies to ensure the right capabilities, people, tools, and expertise are applied to our work. This enables us to offer every client the best solutions to fit their needs and challenges.

ABOUT NOBLIS

Noblis is a nonprofit science, technology, and strategy organization that brings the best of scientific thought, management, and engineering expertise with a reputation for independence and objectivity. We work with a wide range of government and industry clients in the areas of national security, intelligence, transportation, healthcare, environmental sustainability, and enterprise engineering. Together with our wholly owned subsidiaries, Noblis ESI and Noblis NSP, we solve difficult problems of national significance and support our clients' most critical missions.

WORKING WITH US

Government agencies can access Noblis through a variety of contracting mechanisms. We have several IDIQ contracts in place and available to civilian and DoD agencies. We are also a GSA Schedule holder. For a full list of vehicles, visit **noblis.org.**
