

CONTRACT MANAGEMENT TOOLS

Reduce Award Time from Weeks to Days for Contract and Task Order Modifications!

The contracting life cycle is time sensitive. Business intelligence is needed during the post-award phase to ensure that the agency selects the most cost-effective products and services. After contract award, agencies face the daunting task of managing contract complexities. Whether it is a multi-award contract or managing multiple task orders, Noblis contract management tools reduce delays, and ensure compliance through automation.

CONTRACT MANAGEMENT TOOLS:

CONTRACT/TASK ORDER MODIFICATION

Provides a structured workflow to conduct timely reviews of task order and contract modifications submitted by vendors. Included are integrated communication tools used by government and vendor professionals to accelerate online discussion of relevant contract submission material.

DELIVERABLES MANAGEMENT

Organizes and tracks contract and task order deliverables, ensuring timely review of each deliverable and the identification of any missing or overdue contract deliverables.

VENDOR DISCUSSION AND SUBMISSION

Provides an integrated discussion module to facilitate communication with the government. Designed for submission of contract and task order modifications and deliverables.

PRICING MARKETPLACE

Receives vendor pricing data from the vendor submission portal to allow price analysts to review submitted modifications. Designed for a multi-award contracting environment, this portal also provides transparency of pricing data, which encourages competition among vendors and allows agencies to better estimate costs.

SOW SCOPE REVIEW

Facilitates the in-scope determination of agency-prepared statements of work for task orders. This tool is designed for a multi-award contracting environment, and is configurable to the contract type.

Our Contract Management Tools have saved the government over \$7 billion post award by providing transparency and fostering competition among Networkx vendors.

CONTRACT MANAGEMENT TOOLS

REDUCE THE CONTRACT MODIFICATION PROCESS FROM WEEKS TO DAYS

CLIENT SUCCESS STORIES

OVER \$7B IN SAVINGS USING NOBLIS' TOOLS AND PRICING ANALYSIS

At the time of award the GSA Networkx program was the largest telecommunications and networking services program ever launched—billions of dollars in contracts to supply nearly all federal government telecommunications spanning ten years. GSA turned to Noblis to manage the massive amounts of data throughout the life cycle of Networkx. Noblis tools and detailed pricing analysis continue to support the Networkx program resulting in over \$7B in savings to the federal government.

MANAGING THE LAUNCH OF GSA'S LARGEST EVER TELECOMMUNICATIONS CONTRACT

The follow-up to the GSA Networkx program is the GSA Enterprise Infrastructure Solutions (EIS). The EIS contract was extended to 15 years and provides additional service flexibility for the agencies. Due to the size and complexity of an award to ten vendors (including four small businesses) the management of the \$50B EIS contract through 2032 will be challenging. GSA turned to the Noblis contract management tools to facilitate the launch of EIS. With hundreds of contract modifications being proposed monthly and new automation features for the in-scope review process, Noblis tools and expertise help the GSA EIS program thrive!

WHY NOBLIS?

Noblis is a nonprofit science and technology organization with a reputation for independent objectivity that brings the best of scientific thought, engineering expertise, and strategic management. We work with a wide range of government and industry clients in the areas of national security, intelligence, transportation, healthcare, environmental sustainability, and enterprise engineering. Together with our wholly owned subsidiary, Noblis ESI, we solve difficult problems of national significance and support our clients' most critical missions.
