

Your federal acquisitions done right.

# Streamline, Automate and Secure Your Acquisitions from Solicitation to Award

## THE CHALLENGE

### Solving the Complexities of Solicitations and Contract Management

As a federal acquisition professional, you know that source selection can be a complex, long-running and expensive process, and frequently faces protests. After award, your contract management teams must account for every phase of the acquisition lifecycle while also ensuring compliance with all federal and agency-specific regulations. Challenges faced before and after contract award can include:

- Sequestering and guiding the team, and securing and organizing the data to proactively defend against potential protests.
- Ensuring the team follows the source-selection plan
- Managing an increasingly complex contract portfolio and a regular stream of modifications.
- Performing quality reviews of deliverables quickly before automated acceptance of unsatisfactory products takes place.

## THE SOLUTION

### Noblis RunAcquisitions™ Simplifies the Process

Built on decades of experience helping agency clients, Noblis' RunAcquisitions solution secures and manages vendor and government interactions across the acquisition lifecycle from requests for industry input through contract award, management and task order closeout.

#### RunAcquisitions Solution Features:

- Streamlined acquisition processes to reduce time across the lifecycle.
- Compliance with federal regulations.
- Tailorable interface for secure vendor submissions and communications.
- Scalable to manage large, governmentwide contracts and configurable to meet the agency needs.
- Role-based permissions to help team members focus on most important actions.
- Designed to maximize collaboration among team members.
- Secure, anywhere access.
- Automated to optimize the agency's focus on key evaluation criteria.
- Error checking to drive higher-quality proposal submissions.
- Configurable workflow to help the evaluation team make defensible decisions.

## PROVEN TRACK RECORD

Noblis' RunAcquisitions solution has helped hundreds of government programs successfully procure billions of dollars' worth of goods and services.

## Client Testimonial

*“The people, facilities and support provided by Noblis were ‘first class’ and instrumental in fostering the safe and secure environment for our source selection team members to perform extremely demanding and often arduous duties.”*

– Government Program Manager

## A Flexible Suite of Offerings to Meet Your Agency's Needs

The Noblis RunAcquisitions solution is a suite of three offerings designed to meet your needs. Choose one or all, and configure the modules within the solution for further flexibility. All offerings meet FISMA-Moderate security requirements and control data further through role-based access.

### Solicitation Management

The RunAcquisitions Solicitation Management offering provides a framework for handling vendor proposals, managing all documentation and technical data and evaluating submissions. Key features of the module includes:

- Structured documentation tools that streamline the acquisition process, leading to a defensible award decision.
- Guided, collaborative evaluations configured to meet specific source selection with user-based permissions to help evaluators and teams focus on most important actions.
- Repository for storing, organizing and securely sharing large amounts of data with stakeholders.
- Secure structured portals for effective communication between vendors and government teams.
- Pricing evaluation tools to enable in-depth analysis, comparisons and reporting.

### Contract Management

The RunAcquisitions Contract Management offering provides automated tools that help maintain the integrity of deliverables while reducing the modification award from weeks to days, reducing delays and costs. This offering contains several key features:

- Interfaces to schedule and track status of deliverables.
- Automated workflows for efficient deliverable reviews.
- Flexible data collection options for tracking contractor performance, quality and timeliness.
- Automated workflows can reduce modification award times from weeks to days.
- Structured and secure data management.
- Error-checking tools to assist vendors in submitting quality proposals.
- Marketplace for price reviews by government buyers that provides transparency and improves cost estimates.

### Secure Environments

When your evaluation team requires a sequestered environment, consider turnkey environment options available at select Noblis facilities. Amenities include:

- Pre-configured workstations.
- Areas for individual work and for collaboration.
- Extensive physical and logical security.
- On-site support staff.

If the team needs to work virtually or from a government facility, RunAcquisitions' web-based platform and multi-factor authentication keeps work centralized and secure.

### Automate Your Acquisition Process Today

Whether you're looking for full lifecycle management or focusing on a single acquisition phase, Noblis' RunAcquisitions can save you time and money while mitigating many of the headaches that come with security, compliance and contract protests.

## Run with Noblis

The Run with Noblis Solution suite addresses the evolving needs of federal agencies with the speed, performance and scale of digital solutions to create insights, automate workflows, streamline processes and drive greater outcomes. [Learn more at noblis.org/run](https://noblis.org/run).
