

Kaan Ozbay

Professor, Department of Civil and Urban Engineering and the Center for Urban Sciences, New York University

Dr. Kaan Ozbay is a Tenured Professor in the Department of Civil and Urban Engineering and the Center for Urban Sciences at New York University. Dr. Ozbay also serves as the Director at C2SMART, a U.S. Department of Transportation Tier 1 University Transportation Center that uses cities as living laboratories to study challenging transportation problems and find solutions using the unprecedented recent advances in communication and smart technologies, including automated vehicles.

He is the author or co-author of four books and more than 350 refereed articles in academic journals and conference proceedings and was the recipient of the NSF Career

Award in 1999.

Dr. Ozbay received his bachelor's degree in Civil Engineering from Bogazici University in Istanbul, Turkey. He holds a master's degree and a doctorate in Civil and Environmental Engineering (Transportation), both from Virginia Tech, in Blacksburg, Virginia.
